

hp HP Compaq 6200 Pro Business PC
Solid performance and stability

Built around the latest business PC technologies for better performance with the managability and security you expect.

HP recommends Windows® 7 Professional.

Solid PC performance

You expect your PC to perform your everyday business tasks without complications. The HP Compaq 6200 Pro Series includes proven business PC modules and components designed and tested to rigorous business PC standards. Delivered in two familiar form factors, small form factor and microtower with line in and line out and USB ports up front for convenience, the 6200 Pro Series will satisfy your day-to-day business computing requirements.

Technology advancements

Designed for maximum performance throughout its life the HP Compaq 6200 Pro offers the right blend of features and capabilities required for businesses like yours. Enhancements to energy efficiency as well as processing and graphics performance help you get the job done. Integrated dual independent monitor support and wireless NIC options increase productivity and allow for a variety of deployments.

HP has designed this product with materials free of brominated flame retardants¹ (BFRs) and polyvinyl chloride¹ (PVC) to support your institutions environmental initiatives. Reduce your impact on the environment and help lower operating costs with ENERGY STAR® qualified models certified as EPEAT® Gold. Easily optimize the PC's power settings with HP exclusive Power Assistant² application.

Built for business

The HP Compaq 6200 Pro Series is designed to help facilitate a more stable and manageable IT environment with programs and services such as a minimum of 12 months availability that allow for more efficient planning, deployment, and transition of PCs. Global Series models, onsite warranty service and HP's Product Change Notification program help make doing business easier. Upgrades and basic service are made simple and convenient with design principles learned over years of providing quality business PC designs.

Stability and manageability

Refined to include the stability and basic manageability features businesses require, the HP business PC BIOS helps maintain control over IT resources. The HP BIOS helps provide diagnostic and service information making upgrades easier and keeping lifecycle tracking at your fingertips. The integrated Trusted Platform Module (TPM) 1.2 compliant security chip, USB Port Disable, and HP Business PC Security Locks³ offer the essential security you can depend on to help protect your business hardware and data.

Small Form Factor PC

Microtower PC

* System may require upgraded and/or separately purchased hardware and/or a DVD drive to install the Windows 7 software and take full advantage of Windows 7 functionality. Not all features are in all editions of Windows 7. See <http://www.microsoft.com/windows/windows-7/> for details.

** Certain Windows Vista product features require advanced or additional hardware. See www.microsoft.com/windowsvista/getready/hardwarereqs.aspx and www.microsoft.com/windowsvista/getready/capable.aspx for details. Windows Vista Upgrade Advisor can help you determine which features of Windows Vista will run on your computer. To download the tool, visit: www.windowsvista.com/upgradeadvisor.

1. HP Business Desktop PCs are brominated flame retardant and polyvinyl chloride free (BFR/PVC-free); meeting the evolving definition of "BFR/PVC-free" as set forth in the "iNEMI Position Statement on the 'Definition of Low-Halogen Electronics (BFR/CFR/PVC-Free).'" Plastic parts contain <1,000 ppm (0.1 percent) of bromine (if the Br source is from BFRs) and <1,000 ppm (0.1 percent) of chlorine (if the Cl source is from CFRs or PVC or PVC copolymers). All printed circuit board (PCB) and substrate laminates contain bromine/chlorine total <1,500 ppm (0.15 percent) with a maximum chlorine of 900 ppm (0.09 percent) and maximum bromine being 900 ppm (0.09 percent). Service parts after purchase may not be BFR/PVC-free. External power adapter, power cords, keyboard, mouse, and DVI-to-VGA adapter are not BFR/PVC free.
2. HP Power Assistant may not be available in all regions. Use of this application is not required. Power calculations and cost calculations are estimates. Results will vary based on variables, which include information provided by the user, time PC is in different power states (on, standby, hibernate, off), time PC is on battery or AC, hardware configuration, variable electricity rates and utilities provider. HP advises customers to use information reported by HP Power Assistant for reference only and to validate impact in their environment. Environmental calculations were based on U.S. EPA eGrid 2007 data found at www.epa.gov/egrid/. Regional results will vary. Requires Microsoft Windows.
3. Options and accessories sold separately. Availability varies by country.
4. 64-bit computing on Intel architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers and applications enabled for Intel® 64architecture. Processors will not operate (including 32-bit operation) without an Intel 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations. See www.intel.com/info/em64t for more information. Dual Core is designed to improve performance of certain software products. Not all customers will necessarily benefit from the use of this technology. Intel's numbering is not a measurement of higher performance.
5. Maximum memory capacities assume Windows 64-bit operating systems or Linux. With Windows 32-bit operating systems, memory above 3 GB may not all be available due to system resource requirements.
6. For hard drives, GB = 1 billion bytes; 1 TB = 1 trillion bytes. Actual formatted capacity is less. Up to 8GB (for XP and XP Pro), up to 10 GB (for Vista), and up to 16 GB (for Windows 7) of disk space is reserved for the system recovery software.
7. Don't copy copyright-protected materials. Actual speeds may vary. Double Layer is a new technology. Double Layer media compatibility will widely vary with some home DVD players and DVD-ROM drives. Note that DVD-RAM cannot read or write to 2.6GB Single Sided/5.2 Double Sided-Version 1.0 Media.
8. Blu-Ray is a new format containing new technologies; certain disc, digital connection, compatibility and/or performance issues may arise, and do not constitute defects in the product. Flawless playback on all systems is not guaranteed. In order for some Blu-ray titles to play, they may require a DVI or HDMI digital connection and your display may require HDCP support. HD-DVD movies cannot be played on this Desktop PC. Don't copy copyright-protected materials.
9. Requires wireless access. Sold separately.
10. Microsoft Office 2010 Preloaded includes reduced functionality versions of Word and Excel. Purchase of Product Key required to activate full Office 2010 suite available at participating resellers/retailers and <http://www.office.com>.
11. 60-day trial period. Internet access required to receive updates. Subscription required after trial period.
12. Service levels and response times for HP Care Packs may vary depending on geographic location. Restrictions and limitations apply. Service starts at date of hardware purchase. For details, visit www.hp.com/go/carepack.
