Introducing Easy, Cost-Effective Check Encoding You Can Endorse.

Now retailers and financial institutions that process checks for deposit can do it more quickly and efficiently. By combining encoding and endorsing in one simple step, Standard Register's TE1916E streamlines your operation, cuts labor costs and decreases errors. Its reduced footprint—sixteen percent smaller than any previous model—not only takes up less space, it also maximizes throughput. And that can mean savings in per item charges from one to over three cents.

Fulfill Both Present and Future Federal Endorsement Regulations at the Touch of a Button.

The TE1916E meets all present Federal Reserve Bank requirements for deposit endorsements. As checks are fed through the machine, your financial institution's routing and transit number is automatically offset by arrows, in either purple or black ink, in zone two on the back of each check. Other imprinted information includes the date, name, city and state of the depository bank. Optionally, you can choose to incorporate the street address, phone number, serial number and/or to program a payee endorsement.

With the TE1916E's programmable remote keypad, you can enter or change

endorsement information such as dates and serial numbers as needed. And you can store up to fifteen different formats in

memory for increased document processing flexibility and for easy compliance with future regulatory changes.

Standard Register®

- printed audit trail tracks check numbers for preparation of fully qualified deposits at the end of the day
- higher yield ribbons reduce "cost of use" by minimizing necessary changes
- combination of ribbon quality and patented print hammer lowers MICR encoding reject rate to well less than 1/2 of one percent
- improved document track and sensors make for more reliable handling
- larger paper roll size minimizes changes and unnecessary downtime
- flat, uninterrupted surface with check guide makes feeding easy and maximizes holding area workspace
- backlit, 32-character LCD display is easier to read
- larger, more clearly labeled keys enhance readability and maximize operator productivity
- push-button eight key memory can access up to 15 pre-formatted endorsements
- remote keypad allows more operational flexibility

Specifications

- Color: Gray
- Weight: 27 lbs. (12.3 kg)
- Height: 7" (28 cm)
- Width: 17" (67 cm)
- Depth: 16" (630 cm)
- Power: 120 V, 2 Amp. 220V, 2 Amp
240V, 2 Amp
- Ribbon: Cartridge capacity
65,000 MICR character average
250,000 lister character average
750,000 endorser character average
- Font: E13B or CMC7 MICR
- Print Speed: 20 characters per second

Nationwide Service

Standard Register has a full-time complement of thoroughly trained and experienced Customer Engineers located strategically throughout the United States. They are available on call or as part of a preventive maintenance program through a formal service contract.
